

CLAIMS

What is claimed is:

1. A minnow bucket, comprising:
a bucket base;
an automatic dispensing device positioned inside the bucket base that when raised on a vertical axis in relation to the bucket base dispenses at least one minnow; and
a lid connected with the bucket base.
2. The minnow bucket of claim 1, wherein the automatic dispensing device comprises a minnow tray connected with a minnow tray handle.
3. The minnow bucket of claim 2, wherein the minnow tray is formed having a concave shape with a minnow tray opening.
4. The minnow bucket of claim 2, wherein the minnow tray includes a plurality of apertures that allows water to pass through the minnow tray and back into the bucket base.
5. The minnow bucket of claim 1, wherein the bucket base includes a dispenser shoot that allows minnows to travel in a downward direction from the automatic dispensing device to an angler's hand.
6. The minnow bucket of claim 1, wherein the bucket base includes at least one guide rail that guides the automatic dispensing device.
7. The minnow bucket of claim 1, wherein an air pump is connected with the lid for aerating water contained in the bucket base.
8. A minnow bucket, comprising:
a bucket base;
an automatic dispensing device positioned inside the bucket base that when raised on a vertical axis in relation to the bucket base dispenses at least one minnow, wherein the automatic dispensing device comprises a minnow tray connected with a minnow tray handle; and
a lid connected with the bucket base.

9. The minnow bucket of claim 8, further comprising at least one guide rail located on the bucket base for guiding the minnow tray.
10. The minnow bucket of claim 8, wherein the lid includes a minnow return.
11. The minnow bucket of claim 8, further comprising an air pump connected with the lid for aerating water contained in the bucket base.
12. The minnow bucket of claim 8, wherein the bucket base includes a dispenser shoot.
13. A minnow bucket, comprising:
means for holding a plurality of minnows;
means for automatically dispensing solely one minnow from the means for holding a plurality of minnows; and
means for covering the means for holding a plurality of minnows.
14. The minnow bucket of claim 13, wherein the means for holding a plurality of minnows comprises a bucket base.
15. The minnow bucket of claim 13, wherein the means for automatically dispensing solely one minnow comprises an automatic minnow dispensing device.
16. The minnow bucket of claim 14, wherein the automatic minnow dispensing device includes a minnow tray connected with a handle.
17. The minnow bucket of claim 13, wherein the means for covering the means for holding a plurality of minnows comprises a lid.
18. The minnow bucket of claim 13, further comprising means for aerating the means for holding a plurality of minnows.
19. The minnow bucket of claim 18, wherein the means for aerating comprises an air pump connected with an air diffuser.
